the great the good the unfortunate

GREAT!

- Free (registration)
- Lots of tools, charts, fonts, icons, etc. included
- Fairly intuitive/easy to learn
- Same shortcuts (CTRL+Z, CTRL+C, CTRL+V)

GOOD

- Create display signs in a snap with text frames
- Layouts included for each project type (not *tons*)

UNFORTUNATE

- There's no zoom
- Not an easy way to match custom colors (that I've found)
- Measured in pixels; must convert inches to create easily printable document

PRINTING GUIDE

CUSTOM POSTER SIZES

1 USE REPORT OR POSTER TEMPLATES.
These templates have only one block and hence allow easy customisation.

2 WANT LANDSCAPE MODE? Switch the dimensions below. **EXAMPLE:** 11 x 17 inches
Portrait Dimensions: 1000px x 1546px
Landscape Dimensions: 1546px x 1000px

3 SET BLOCK DIMENSIONS IN BLOCK SETTINGS.
Click on the link below to learn how to customise block dimensions.

4 DOWNLOAD IN HIGHEST RESOLUTION
ADVANTAGE FOR PRO USERS:
Image - Go to Custom and insert 5,000px for width. with the maximum DPI.
